Software Engineer, General Manager

Be Data Solutions Limited (<https://bedatasolutions.com>)

My contributions as a Lead Software Engineer :

- Improving the operational flow of projects.
- Conducting thorough requirement analysis.
- Database design and validation with proper test cases.
- Designed and developed RESTful APIs for front-end and mobile applications.
- Introduced Service-Oriented Architecture.
- Enhanced performance by optimizing complex Eloquent queries and implementing caching strategies.
- Secured web applications using best practices in authentication, authorization, and input validation.
- Integrated third-party services such as payment gateways and Google Maps API.
- Bug fixing, customization, and integration of new features.
- Deploy projects from cPanel to AWS ECS.
- Deployed projects in Kubernetes Cluster with a CI/CD Pipeline.
- Testing with PHPUnit.
- Collaborated in Agile teams, contributing to sprint planning, task breakdown with priorities, backlog grooming, and stand-ups.
- Followed Scrum methodologies and maintained Trello boards for project task management.

Accomplishments :

- Contributed to three projects: two NHS hospitals (NGH and GEH) and a Wedding Event Management platform.
- Successfully supported hospital systems managing 100K+ patient records annually.
- Helped grow the wedding event platform, reaching 1.5K+ registered vendors and expanding customer engagement.
